NSF Project: Judicial Diversity and Appellate Decision Making CODEBOOK

Citation: Christensen, Robert, Susan Haire, Laura Moyer, and John Szmer. “Judicial Diversity and Appellate Decision Making.” Version 8/13/21. [Replaces 5.28.21 version]

Foreword

This research project gathered information on decision making in the U.S. Courts of Appeals from 2009-2016. With funding from the National Science Foundation,¹ we have been collecting data to examine how demographic diversity in the judiciary affects case outcomes, opinion content, and other aspects of decision making. This dataset represents the first stage of this project; it also provides users with more recent data to extend the existing Multi-User Database on the U.S. Courts of Appeals.² Similar to the Multi-User Database, we used a stratified random sample of 30 cases per circuit-year, totaling 2,880 cases over the period. We automated coding for some variables. For others, Barry Edwards, a consultant on this project, developed an on-line interface and drop-down menus that allowed research assistants to code and record information from the body of the opinion. We should emphasize that, when comparing this dataset with the existing Multi-User Database, we coded a subset of variables. Moreover, users should pay close attention to differences in coding for many variables. For example, rather than coding the number of amicus participation (and for which side), we coded the variable “amicus” to be “1” if any amicus brief was filed. Below, we list all variables, along with coding rules.

In addition to this documentation:

1. STATA dataset, with case data – 2009-2016
2. Excel spreadsheet with judge data (all living federal judges, 2008-2016)

¹ Data for this project were collected with support from the National Science Foundation (NSF-SES #1655159, 1654614, 1654559, 1654697). Any opinions, findings, and conclusions or recommendations expressed are those of the authors and do not necessarily reflect the views of the National Science Foundation.

² Presently, the Multi-User Database includes cases from 1925-2002. Information on the archived Database (previously funded by NSF) is available at <http://artsandsciences.sc.edu/poli/juri/appct.htm>.

3. Compressed file with excel spreadsheets with the universe of case citations, by circuit year, from which the samples were drawn (users may need this for weighting purposes; or, they may wish to augment the observation set).

BASIC CASE CHARACTERISTICS

CASENUM This field represents a simple unique identifier for each case, beginning with XXXX for the first case coded from 2009 and proceeding consecutively.

CASENAME This field provides the caption/title of the case.

CITATION This field provides the full citation to the case.

YEAR (YYYY) The year of the decision date.

MONTH (MM) The month of the decision date.

DAY (DD) The day of the decision date.

CITE VOL Using the case citation, this is the volume of the Federal Reporter.

BEGINPG is the page on which the case begins in the Federal Reporter.

ENDOPIN is the last page of the majority opinion.

ENDPAGE indicates the last page in the case (e.g., the last page of a dissenting or concurring opinion). **ENDOPIN** and **ENDPAGE** will generally be the same in decisions with no dissents and no concurrences. However, **ENDPAGE** may also be greater than **ENDOPIN** when there is an appendix or some memorandum at the end of the majority opinion.

DOCNUM lists the docket number of the case coded. For opinions that resolved more than one docket number, the first docket number listed is recorded in this field.

MULTDOCK lists the number of docket numbers of the case coded.

CIRCUIT

This field records the circuit of the court that decided the case. The District of Columbia circuit is coded as XX and all other circuits by their number.

TYPE OF OPINION (“OPINSTAT”)

Version: 8.13.21
[replaces 5.28.21 version]

This field records whether there was an opinion in which the opinion writer was identified or whether the opinion was per curiam. Most opinions are signed, with reasons. The variable takes the following values:

1= signed, with reasons
2= per curiam, with reasons
9=not ascertained

METHOD OF DECISION

This variable records the nature of the proceeding in the court of appeals for the citation selected. It records something of the legal history of the case, indicating whether there had been prior appellate court proceeding on the same case prior to the decision currently coded.

1 = decided by panel for first time (no indication of rehearing or remand).
2 = decided by panel after re-hearing (i.e., this is the second time this case has been heard by this same panel).
3 = decided by panel after remand from Supreme Court
4 = decided by court en banc, after single panel decision
5 = decided by court en banc, after multiple panel decisions
6 = decided by court en banc, no prior panel decisions
7 = decided by panel after remand to lower court (e.g., an earlier decision of the court of appeals remanded the case back to the district court which made another decision. That second decision of the district court is now before the court of appeals on appeal).
8 = other
9 = not ascertained

Notes:

- i) coders generally assumed that the case had been decided by the panel for the first time if there was no indication to the contrary in the opinion.
- ii) the opinion usually, but not always explicitly indicates when a decision was made "en banc." However, if more than 3 judges were listed as participating in the decision, the decision was coded as en banc even if there was no explicit description of the proceeding as en banc.

STATE

This field records the state or territory in which the case was first heard. If the case began in the federal district court, it is the state of that district court. If it is a **habeas corpus** case, it is the state of the state court that first heard the case. If the case originated in a federal administrative agency, the variable is coded as "not applicable."

DISTRICT: REGULAR COURT OF DISTRICT JUDGE

This field indicates which district, if any, a federal district court judge comes from (e.g., Eastern). Some states are only one district.

TYPE OF COURT OR AGENCY THAT MADE ORIGINAL DECISION* (“ORIGIN”)

This field records the type of court that made the original decision. Often, this will be the same as the SOURCE. (Note that cases removed from a state court are coded as originating in federal district court.) The variable takes the following values:

- 1 = federal district court (single judge)
- 2 = 3 judge district court
- 3 = state court (includes habeas corpus petitions after conviction in state court; also includes petitions from courts of territories other than the U.S. District

Version: 8.13.21

Courts)

- 4 = bankruptcy court, referee in bankruptcy, special master
- 5 = federal magistrate
- 6 = originated in federal administrative agency
- 7 = special DC court (i.e., not US District Court for DC)
- 8 = other (e.g., Tax Court, a court martial)
- 9 = not ascertained
- 10 = *Tax Court*
- 11 = *ALJ*

FORUM FROM WHICH DECISION APPEALED* (“**SOURCE**”)

This field identifies the forum that heard this case immediately before the case came to the court of appeals. Note that often the SOURCE and ORIGIN will be the same. The variable takes the following values:

- 1 = federal district court (single judge)
- 2 = 3 judge district court
- 3 = state court
- 4 = bankruptcy court or referee in bankruptcy
- 5 = federal magistrate
- 6 = federal administrative agency
- 7 = Court of Customs & Patent Appeals
- 8 = Court of Claims
- 9 = Court of Military Appeals
- 10 = Tax Court or Tax Board
- 11 = administrative law judge
- 12 = U.S. Supreme Court (remand)
- 13 = special DC court (i.e., not the US District Court for DC)
- 14 = earlier appeals court panel
- 15 = other
- 16 = not ascertained
- 17 = *bankruptcy appellate panel (BAP)*

DISTRICT JUDGE DECIDING CASE BELOW (“**DISTJUDG**”)

This field identifies the federal district court judge (if any) that heard the case in the original trial. *In a separate excel spreadsheet, you can find two lists of codes for all judges, who were alive during this time period. In one worksheet, we provide a list, downloaded from the FJC in 2018, of all federal judges, along with background information provided by the FJC. In another worksheet, we provide a list of all district court judge names and codes.* If the case was decided by a magistrate, this field is set to missing/blank.

Version: 8.13.21
[replaces 5.28.21 version]

TYPE OF DISTRICT COURT JUDGMENT APPEALED FROM (“APPLFROM”)

This field records the type of district court decision or judgment appealed from (i.e., the nature of the decision below in the district court). If there was no prior district court action, the variable is coded as not applicable.

- 1 = trial (either jury or bench trial)
- 2 = injunction or denial of injunction or stay of injunction
- 3 = summary judgment or denial of summary judgment
- 4 = guilty plea or denial of motion to withdraw plea
- 5 = dismissal (includes dismissal of petition for habeas corpus; also includes denial of habeas below)
- 6 = appeals of post judgment orders (e.g., attorneys' fees, costs, damages, judgment notwithstanding the verdict (JNOV), also code judgment as a matter of law here (JAML)
- 7 = appeal of post settlement orders
- 8 = not a final judgment: interlocutory appeal
- 9 = not a final judgment: mandamus
- 10 = other (e.g., pre-trial orders, rulings on motions, directed verdicts) or could not determine nature of final judgment.
- 11 = does not fit any of the above categories, but opinion mentions a "trial judge"
- 12 = not applicable (e.g., decision below was by a federal administrative agency, tax court)

****If a criminal case and the only issue on appeal concerns the sentence, then it should be coded as “6”***

ADMIN REVIEW* (“ADMINREV”)

This field indicates which federal regulatory agency that a decision was appealed from, if applicable.

- 0 = Not applicable
- 1 = Benefits Review Board
- 2 = Civil Aeronautics Board
- 3 = Civil Service Commission
- 4 = Federal Communications Commission
- 5 = Federal Energy Regulatory Commissions
- 6 = Federal Power Commission
- 7 = Federal Maritime Commission
- 8 = Federal Trade Commission
- 9 = Interstate Commerce Commission
- 10 = National Labor Relations Board
- 11 = Atomic Energy Commission

Version: 8.13.21
[replaces 5.28.21 version]

12 = Nuclear Regulatory Commission
13 = Securities & Exchange Commission
14 = Board of Immigration Appeals
88 = Other federal agency
99 = Not ascertained

CITATION TO PRIOR PUBLISHED OPINION (“**PRIORPUB**”)

Was there a prior published opinion (from any court, including the U.S. Courts of Appeals) for this case? If so, record the opinion citation. If not, code as zero. Note that references to Lexis or Westlaw (WL) designations are not published opinions.

WAS THIS A CLASS ACTION OR RAISE AN ISSUE SURROUNDING WHETHER IT SHOULD BE A CLASS ACTION? (“**CLASSACT**”)

0=no
1=yes

WERE THERE CROSS APPEALS? (“**CROSSAPP**”)

This field is a dummy variable that records whether there were cross appeals from the decision below to the court of appeals that were consolidated in the present case. The variable takes the following values:

0=no cross appeals
1=yes, cross appeals were filed

PARTY INITIATING APPEAL (“**INITIATOR**”)

This field records which of the parties below initiated the appeal. Note that in cases with cross appeals or multiple docket numbers, if the opinion does not explicitly indicate which appeal was filed first, the coding assumes that the first litigant listed as the "appellant" or "petitioner" was the first to file the appeal. In federal habeas corpus petitions, the prisoner is considered to be the plaintiff for purposes of this variable. The variable takes the following values:

1 = original plaintiff
2 = original defendant
3 = federal agency representing plaintiff
4 = federal agency representing defendant
5 = intervenor
8 = not applicable
9 = not ascertained

Version: 8.13.21
[replaces 5.28.21 version]

TREATMENT (“TREAT”)

This field records the disposition by the court of appeals of the decision of the court or agency below; i.e., how the decision below is "treated" by the appeals court. That is, this variable represents the basic outcome of the case for the litigants and indicates whether the appellant or respondent "won" in the court of appeals. The variable takes the following values:

- 0= stay, petition, or motion granted
- 1= affirmed; or affirmed and petition denied
- 2= reversed (include reversed & vacated)
- 3= reversed and remanded (or just remanded)
- 4= vacated and remanded (also set aside & remanded; modified and remanded)
- 5= affirmed in part and reversed in part (or modified or affirmed and modified)
- 6=affirmed in part, reversed in part, and remanded; affirmed in part, vacated in part, and remanded
- 7= vacated
- 8= petition denied or appeal dismissed
- 9= certification to another court
- 10= not ascertained
- 11=affirmed, vacated (with no mention of reverse), and remanded

PARTICIPANTS

Note: for these fields, intervenors who participated as parties at the courts of appeals are counted as either appellants or respondents when it could be determined whose position they supported. For example, if there were two plaintiffs who lost in district court, appealed, and were joined by four intervenors who also asked the court of appeals to reverse the district court, the number of appellants was coded as six.

Appellant(s) Info

In some cases, there is some confusion over who should be listed as the appellant and who as the respondent. This confusion is primarily the result of the presence of multiple docket numbers consolidated into a single appeal that is disposed of by a single opinion. Most frequently, this occurs when there are cross appeals and/or when one litigant sued (or was sued by) multiple litigants that were originally filed in district court as separate actions.

The coding rule followed in such cases was to go strictly by the designation provided in the title of the case. The first person listed in the title as the appellant was coded as the appellant even if they subsequently appeared in a second docket number as the respondent and regardless of who was characterized as the appellant in the opinion.

Version: 8.13.21
[replaces 5.28.21 version]

HOW MANY? (“NUMAPPEL”)

This field records the total number of appellants in the case. If the total number cannot be determined (e.g., if the appellant is listed as "Smith, et. al." and the opinion does not specify who is included in the "et.al."), then 99 is recorded.

TYPE (“GENAPEL1”)

To provide a general classification of appellants, this field reports the coding of the first listed appellant. The 9 categories are the same as the first digit of the detailed coding of the appellants. The variable takes the following values:

- 1 = private business (including criminal enterprises)
- 2 = private organization or association (including charitable trusts acting like NGO or interest group)
- 3 = federal government (includes DC)
- 4 = sub-state government (e.g., county, local, special district)
- 5 = state government (includes territories & commonwealths)
- 6 = government - level not ascertained
- 7 = natural person (excludes persons named in their official capacity or who appear because of a role in a private organization)
- 8 = miscellaneous (including fiduciaries and trustees)
- 9 = not ascertained

(if state or local party, then record the state)

PRISONER (“A_PRISONER”)

This variable indicates whether the appellant is a prisoner in a state or federal prison and is challenging something about the conditions in prison (e.g., civil rights, liberties, etc.) and/or bringing a habeas petition. This is NOT the same as an appeal by a (convicted) criminal defendant. (Note that if a case involves a prisoner, you will also code “7” for individual above.)

- 0 = no
- 1 = yes

COUNSEL (“COUNSEL1”)

This variable indicates the type of legal representation that the appellant has. (If a litigant is pro se, do not count them as an attorney.) It takes the following values:

- 1 = none (pro se)
- 2 = court appointed
- 3 = legal aid or public defender
- 4 = private

Version: 8.13.21
[replaces 5.28.21 version]

5 = government - US
6 = government - state or local
7 = interest group, union, professional group
8 = other or not ascertained **or some combination of the categories above**

NO. FIRMS (“A_FIRMS”)

Enter the number of named firms appearing for each side. If a the legal counsel for a party just lists an attorney’s name but no firm (e.g., Dave Jones, Cleveland, OH, on the brief for the appellant), then code 99 for the number of firms. If the government is represented by more than one different offices, then count each office separately. (This happens most often with cases in which the federal government is a party.) For instance, if there is a lawyer from the Department of Justice, the US Attorney’s Office in New York, and the EPA, this would count as 3 firms (despite all of them being “federal government.”) Amicus groups do not count as firms here. Truncate the value at 50 if more than 50 firms. Code as 99 if not ascertained.

NO. ATTYS (“A_ATTY”)

Enter the number of attorneys appearing for each side. Pro se litigants do not count as an attorney. Do not count attorneys representing amicus groups here. Truncate the value at 50 if more than 50 firms. Code as 99 if not ascertained.

ISSUES CODING

WHAT TYPE OF CASE (“TYPEISS”)

This variable indicates broadly the type of case. “Criminal” cases include both federal and state cases. “Civil – government” are civil law cases in which the government is a party. “Civil – private” are civil law cases in which both parties are non-governmental actors. “Diversity” cases refer to disputes involving parties from different states (“diversity of citizenship”), NOT diversity in the sense of affirmative action, etc.

Note: Most users will find the GENISS variable to be a better way to identify the general legal policy involved in the conflict between the parties.

1 = Criminal

2 = Civil-gov’t

3 = Civil-Private

4 = Diversity (type of civil-private about disputes between citizens of different states)

5 = Other/not ascertained

GENERAL POLICY ISSUE CATEGORY (“GENISS”)

This field represents a conventional way of identifying the case from an overall legal policy issue. To avoid confusion with other ways of conceptualizing the issue in the case, this variable should correspond to the first case type coded (see fields below). The field identifies the social and/or political context of the litigation. Put somewhat differently, this field identifies the nature of the conflict between the litigants.

Many of the categories closely parallel the issue categories in the Spaeth Supreme Court database (Phase I) and are identical to those used in the original Songer database.

1 = criminal (includes habeas cases)

2 = civil rights

3 = First Amendment

4 = due process

5 = privacy

6 = labor relations

7 = economic activity and regulation

9 = miscellaneous

Version: 8.13.21
[replaces 5.28.21 version]

PRIMARY ISSUE (“CASETYP1”) and SECONDARY ISSUE (“CASETYP2”)

Up to two case types are coded for each case, though the majority of cases have only one case type (“primary issue”). No decision was made in coding about which issue was the most important when two or more case types were present.

Case types are associated with the summary category assigned (“GENISS”). For instance, a case coded as a “1” for GENISS will have a CASETYP1 that is in the 100-range.

Summary categories

1. Summary category *CRIMINAL* (includes appeals of conviction, petitions for post-conviction relief, habeas corpus petitions, and other prisoner petitions which challenge the validity of the conviction or the sentence), then select from the following more detailed case types. Note that in habeas cases, if a petitioner is challenging a state conviction, it was coded as a state criminal offense rather than a federal offense.

Federal offenses

- 101 murder
- 102 rape
- 103 arson
- 104 aggravated assault
- 105 robbery
- 106 burglary
- 107 auto theft
- 108 larceny (over \$50)
- 109 other violent crimes
- 110 narcotics
- 111 alcohol related crimes, prohibition
- 112 tax fraud
- 113 firearm violations
- 114 morals charges (e.g., gambling, prostitution, obscenity)
- 115 criminal violations of government regulations of business
- 116 other white collar crime (involving no force or threat of force; e.g., embezzlement, computer fraud, bribery)
- 117 other crimes
- 118 federal offense, but specific crime not ascertained
- 119 RICO

State offenses

- 121 murder

156 other white collar crime (involving no force or threat of force; e.g.,
embezzlement, computer fraud, bribery)
157 other crimes
158 specific crime not ascertained

**Note: code sexual assault under category "rape."*

2. Summary issue category, CIVIL RIGHTS (includes civil suits instituted by both prisoners and non-prisoners alleging denial of rights by criminal justice officials; alien deportation petitions). This category excludes First Amendment, due process, and claims of denial of rights in criminal proceeding or claims by prisoners that challenge their conviction or their sentence (e.g., habeas corpus petitions are coded under the criminal category).

Civil rights claims by prisoners and those accused of crimes

Version: 8.13.21
[replaces 5.28.21 version]

-contesting the condition of their imprisonment or the denial of their rights in prison (not used for petitions filed while in prison which contest their sentence or conviction)

- 201 suit for damages for false arrest or false confinement
- 202 cruel and unusual punishment
- 203 due process rights in prison
- 204 denial of other rights of prisoners -42 USC 1983 suits
- 205 denial or revocation of parole -due process grounds
- 206 other denial or revocation of parole
- 207 other prisoner petitions
- 208 excessive force used in arrest
- 209 other civil rights violations alleged by criminal defendants

**Notes – code suit for malicious prosecution or false conviction as “201.” If a prisoner sought damages under 42 USC 1983 alleging that some action of prison officials was “cruel & unusual punishment,” the normal coding would be casetyp1=204 and casetyp2=202).*

Voting rights, race discrimination, sex discrimination

- 210 voting rights - reapportionment & districting
- 211 participation rights - rights of candidates or groups to fully participate in the political process; access to ballot
- 212 voting rights - other (includes race discrimination in voting)
- 213 desegregation of schools
- 214 other desegregation
- 221 employment race discrimination - alleged by minority
- 222 other race discrimination -alleged by minority
- 223 employment: race discrimination - alleged by Caucasian (or opposition to affirmative action plan which benefits minority)
- 224 other reverse race discrimination claims
- 231 employment: sex discrimination -alleged by woman
- 232 pregnancy discrimination
- 233 other sex discrimination - alleged by woman
- 234 employment: sex discrimination - alleged by man (or opposition to affirmative action plan which benefits women)
- 235 other sex discrimination - alleged by man
- 239 suits raising 42 USC 1983 claims (if raised as part of opposition to government economic regulation, code the economic issue as the 1st issue and 239 as the 2nd issue)

Other civil rights

- 241 alien petitions - (includes disputes over attempts at deportation; other immigration cases coded as 921)
- 251 Indian rights and law (note: under this code, only civil rights claims under Indian law are recorded; see categories 910-916 for other Indian law case types)
- 261 juveniles

Version: 8.13.21
[replaces 5.28.21 version]

271 poverty law, rights of indigents (civil)
281 rights of handicapped (includes employment); ADA
282 age discrimination (includes employment)
283 discrimination based on religion or nationality
284 discrimination based on sexual preference (except for category 502)
285 AIDS/HIV discrimination
290 challenge to hiring, firing, promotion decision of federal government (other than categories above)
291 other 14th amendment and civil rights act cases
299 other civil rights

3. Summary issue category *FIRST AMENDMENT*

Religion, press, commercial

301 commercial speech
302 libel, slander, defamation
303 free exercise of religion
304 establishment of religion (other than aid to parochial schools)
305 aid to parochial schools
306 press

Speech and other expression

307 obscenity (note: if challenge to obscenity law is part of appeal of criminal conviction or as part of challenge to a zoning law, two case types should be coded- 307 plus the appropriate criminal or economic category)
308 association
309 federal internal security and communist control acts, loyalty oaths, security risks
310 legality of expression in context of overt acts (speeches, parades, picketing, etc.) protesting race discrimination
311 overt acts -opposition to war and the military
312 conscientious objection to military service or other first amendment challenges to the military
313 expression of political or social beliefs conflicting with regulation of physical activity (includes demonstrations, parades, canvassing, picketing)
314 threats to peace, safety, and order (except those covered above) (includes fighting words, clear and present danger, incitement to riot)
315 challenges to campaign spending limits or other limits on expression in political campaigns
399 other (includes tests of belief)

4. Summary issue category *DUE PROCESS* is for civil cases by persons other

Version: 8.13.21
[replaces 5.28.21 version]

than prisoners. This category does not include due process challenges to government economic regulation (those challenges are included in category 7 - Economic Activity and Regulation).

410 denial of fair hearing or notice - government employees (includes claims of terminated government workers)
411 denial of hearing or notice in non-employment context
412 taking clause (i.e., denial of due process under the "taking" clause of the 5th or 14th Amendments)
413 freedom of information act and other claims of rights of access (includes all cases involving dispute over requests for information even if it does not involve the Freedom of Information Act)
499 other due process issues

5. Summary issue category *PRIVACY*

501 abortion rights
502 LGBT rights where privacy claim raised
503 contraception and other privacy claims related to marital relations or sexual behavior (not in 501 or 502)
504 suits demanding compensation for violation of privacy rights (e.g., 1983 suits)
505 mandatory testing (for drugs, AIDs, etc)
506 mandatory sterilization
507 right to die or right to refuse medical help
599 other

6. Summary issue category *LABOR*

601 union organizing
602 unfair labor practices
603 Fair Labor Standards Act issues
604 Occupational Safety and Health Act issues (including OSHA enforcement)
605 collective bargaining
606 conditions of employment
607 employment of aliens
608 which union has a right to represent workers

IS IT A HABEAS CORPUS PETITION (“**HABEAS**”)

0=no
1=yes

Version: 8.13.21
[replaces 5.28.21 version]

CASE ABOUT SENTENCE OTHER THAN DEATH PENALTY (“**SENTENCE**”)

Did the appeal raise an issue about the sentencing of a criminal defendant in federal court? (Does not include death penalty cases.)

0=no
1=yes

APPEAL INVOLVING DEATH PENALTY (“**DEATHPEN**”)

0=no
1=yes

ISSUES RAISED IN MAJORITY OPINION’S REASONING

Note that these are coded differently than in earlier versions of the Songer database.

ISSUE OF CONSTITUTIONALITY DISCUSSED (“**CONSTIT**”)

0=no
1=yes

DOES OPINION REQUIRE INTERPRETATION/CONSTRUCTION/APPLICATION OF FEDERAL STATUTE (“**FEDLAW**”)

To apply, there must be a federal statute involved.

0=no
1=yes

DISPOSITION OF CASE TURNS ON A THRESHOLD ISSUE (“**THRESHOLD**”)

Did the case turn on a threshold issue? That is, the court focused only on a procedural issue with no need to reach the “merits.” For example, the appeal was not timely or the court did not have jurisdiction.

0=no
1=yes

DID COURT DECIDE WHETHER SUMMARY JUDGMENT IS APPROPRIATE? (“**SUMMARY**”)

Did the court decide whether summary judgment was appropriate? (coded as no if trial court disposition was not in the form of summary judgment and/or issue is not discussed in reasoning)

Version: 8.13.21
[replaces 5.28.21 version]

0=no
1=yes

KEYTOTAL

Record the total number of key numbers in the opinion, based on the “headnotes” in WESTLAW (they are numbered so you only need to scan to find the last number).

Please see the Appendix for a list of directionality coding for each case type.
ISSUE #1 OUTCOME (“**DIRECT1**”).

This field reports the directionality of the decision of the court in terms of who wins and who loses with respect to the first coded case type (“primary issue”/**CASETYP1**) from the Issues section. If the Issues section is coded, you will see reminders as to what was already coded as the General Issue, the primary issue, and the secondary issue (if there was one).

For all categories, a "2" was coded if the directionality of the decision was intermediate to the extremes defined above, or if the decision was mixed (e.g., the conviction of defendant in a criminal trial was affirmed on one count but reversed on a second count or if the conviction was affirmed but the sentence was reduced.) A "0" indicates that the directionality was not ascertained.

When a case has two distinct issues, evaluate each one separately in terms of the outcome. For instance, a decision in favor of the plaintiff on a race claim but the defendant on an age discrimination claim should NOT be coded as mixed. Rather, the outcome for each issue should be coded separately (here, a 3/pro-plaintiff for the race claim and 1/pro-defendant on the age claim). This is also true for criminal cases with separate charges. For instance, a defendant is convicted on an aggravated assault charge and a narcotics charge, and on appeal, the conviction is affirmed, but there was a problem with the quantity calculated for the sentence associated with the narcotics charge. The aggravated assault issue code will be a "1" (for the prosecution) but the narcotics issue code will be a "2" (because it is mixed).

* Note: Users of the database may easily develop their alternative definitions of liberal, conservative, etc., by simply recoding whichever issue categories they choose or by excluding certain issue categories altogether.

ISSUE #2 OUTCOME (“**DIRECT2**”)

This field reports the directionality of the decision of the court in terms of who wins and who loses with respect to the second coded case type (“secondary issue”) from the Issues section. If the Issues section is already coded, you will see reminders as to what was already coded as the General Issue, the primary issue, and the secondary issue.

JUDGES AND VOTES

Number of **MAJVOTES**

DISSENT – flagged 1 if nonunanimous decision

CONCUR – flagged 1 if separate concurring opinion filed.

(“CODEJ1”)

For each case, coders consulted a list of all federal judges downloaded from the FJC in 2017. While most of these are active and senior judges who sit in that circuit, in many instances, judges were sitting by designation. CODEJ1 is the identification code for the judge who wrote the majority opinion or the first listed on opinion. In per curiam decisions, select the first listed judge in the opinion as Judge 1. Please note that these codes are **NOT** the same codes that were used in earlier versions of the Songer Multi-User database. A separate excel spreadsheet includes a list of the codes and names used for each judge in the dataset. This list represents all federal judges who were living during the time period, downloaded from the FJC in 2018, along with background information (also provided by the FJC).

(“CODEJ2”)

Identification code for the second listed judge on the panel.

(“CODEJ3”)

Identification code for the third listed judge on the panel.

(“CODEJ4” – “CODEJ15”)

These are identification codes for additional judges in cases that were decided en banc.

NUMBER OF JUDGES – number of USCA judges who participated in the decision. Most cases were decided by three-judge panels.

“J1MAJ1”....”J15MAJ1”

The variable indicates whether the judge was in the majority on the first issue. If so, it is coded 1. If the judge dissented, it is coded “2”; if the judge concurred separately, it is coded “3”. If the judge’s vote/opinion did not fall into any of these categories, it is coded “9”. J1 represents the opinion author (if a signed opinion). Because no case had more than 15 judges who participated, this does not go beyond J15.

“J1MAJ2”....”J15MAJ2”

Version: 8.13.21
[replaces 5.28.21 version]

The variable indicates whether the judge was in the majority or joined a separate opinion on the second issue. J1 represents the opinion author (if a signed opinion). Because no case had more than 15 judges who participated, this does not go beyond J15.

“J1VOTE1”....”J15VOTE1”

This variable measures the judge’s vote on casetyp1 in terms of the policy outcome (see explanation of DIRECT1)

“J1VOTE2”....”J15VOTE2”

This variable measures the judge’s vote on casetyp2 in terms of the policy outcome (see explanation of DIRECT2)

Version: 8.13.21
[replaces 5.28.21 version]

Appendix – list for DIRECT and outcomes for JVOTE by issue area.

Coding rules are identical to those conventions adopted in the existing Multi-User Database. Overall, outcomes are coded to reflect which party won, in a particular issue area. The directionality coding does not impose any definition of "liberal", "conservative", or any other ideological label on any user.

Users may easily develop their alternative definitions of liberal, conservative, etc., by simply recoding whichever issue categories they choose or by excluding certain issue categories altogether.

For all categories, a "2" was coded if the directionality of the decision was intermediate to the extremes defined above or if the decision was mixed (e.g., the conviction of defendant in a criminal trial was affirmed on one count but reversed on a second count or if the conviction was affirmed but the sentence was reduced. A "0" indicates that the directionality was not ascertained.
